SUMMER WATERING PROGRAM

The Jennings Northwest Regional Utilities is continuing the *Summer Watering Program* in 2013. This program will allow customers a credit on the sewer portion of their utility bills based on the metered volume of water used by a customer for lawn watering, landscaping, filling swimming pools, and other miscellaneous summertime uses where the water is not entering into the sanitary sewer system. We anticipate significant savings to customers through the summer months that are typically the largest water consumption months of each year. If the program is well received by customers and is financially manageable, each year the utility board would designate four summer months in which customers can sign up for the program; *May, June, July* and *August* are the designated months for 2013. All customers are eligible to sign up for the Summer Watering Program; however, to qualify for the sewer credit, each customer must meet the program criteria outlined below:

- **Sign Up:** Customers must sign up for the program *before* a summer watering credit will be calculated or applied. (*No water consumption credits will be given for sign up after-the-fact!*)
- **Minimum Credit Limit:** Credits will be based on the customers' average consumption during the prior twelve-months. The consumption of summer watering use must exceed 1,300 gallons to qualify for the credit (*1,300 gallons is approximately a \$10 sewer credit*).
- **Maximum Credit Limit:** There is no maximum credit limit.
